Class work on Lab 02

(B Group)

NOTE: write all the commands (each command in a new line) for the following tasks sequentially in a text file and save the file as [name].sql.

1. Create the following tables:
   ```
   students (roll number(4), name varchar(20), enrolment_date date);
   courses (c_id varchar(10), c_name varchar(30), year number(1), term number(1));
   ```

2. Now describe the above created tables.
3. In students table, add a field named phone varchar(15).
4. In students table, alter the data type of roll field to number(7).
5. In courses table, rename field c_id to c_no.
6. Now describe the above created tables again.
7. Now insert two demo records in both the tables.
8. Now show both tables with data.
